

## AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 3, line 5, with the following rewritten paragraph:

--In one aspect of the invention, a double valve comprises first and second unitary valve assemblies each having a respective inlet port, a respective outlet port, a respective exhaust port, a respective first cross-mirror port, and a respective second cross-mirror port. First and second pilot assemblies are coupled to the first and second unitary valve assemblies, respectively. A first plate is coupled to the first and second unitary valve assemblies and includes respective passages to provide a common inlet port coupled to the respective inlet ports of the first and second unitary valve assemblies; and a common outlet port coupled to the respective outlet ports of the first and second unitary valve assemblies, ~~and a common exhaust port coupled to the respective exhaust ports of the first and second unitary valve assemblies.~~ A second plate ~~is~~ coupled to the first and second unitary valve assemblies ~~providing~~ includes respective passages to provide a first cross-connection between the first cross-mirror port of the first unitary valve body and the second cross-mirror port of the second unitary valve body, ~~and providing~~ a second cross-connection between the second cross-mirror port of the first unitary valve body and the first cross-mirror port of the second unitary valve body, and a common exhaust port coupled to the respective exhaust ports of the first and second unitary valve assemblies. --
